Programmer Internship

Are you motivated, and interested in the world around you?

Spatial and location data is ubiquitous across every industry. GIS is the technology that brings it to life – on mobile, desktop, and the web. If you want to be mentored in a small, team-focused environment and work on problems that have an immediate impact, Pro-West & Associates would love to talk with you!

Pro-West & Associates, Inc. (www.prowestgis.com) is a GIS (geographic information systems) consulting firm located in Walker, MN and Crosslake, MN. Pro-West has been providing highly specialized GIS consulting, programming, and data management services to regional and national clients since its founding in 1987. We are a team of professionals and technology experts who have delivered successful projects to our clients for more than 30 years! We are one of the Upper Midwest's longest-established private firms devoted entirely to assisting public and private entities with the integration of location technology.

Pro-West and Associates is looking for a **Programming Intern** who will serve as a member of the Data Development Team while sharpening their software development skills. The **Programming Intern** position will expose applicants to the Esri GIS software platform and provide the opportunity to work within a fast-paced, professional environment delivering real solutions to real clients.

This is a paid intern position located in our Walker, MN office for Spring or Summer 2019. FT Preferred.

Job Responsibilities

- Participate in the design of simple and complex applications
- Work as a part of a team to implement applications that adhere to design specifications
- Test, troubleshoot, and debug errors in new and existing applications
- Write clean, concise user and system documentation
- Participate in internal training programs
- Participate in meetings with clients

Required Qualifications

- Current enrollment in a computer science or closely related field
- Experience with JavaScript. Node.js experience is a plus
- Web application development with HTML5 and CSS3 is a plus
- Experience using a relational database as a web application backend is a plus

Preferred Qualifications

- Strong work ethic, a drive for success and proactive attitude
- Strong communication skills
- Experience working in small teams
- Desire and enthusiasm to learn new skills
