

Application Developer

Pro-West & Associates, Inc. (www.prowestgis.com) is a GIS (geographic information systems) consulting firm located in Walker, MN and Crosslake, MN. Pro-West provides highly specialized GIS consulting, programming, and data management services. We are a team of professionals and technology experts who have delivered successful projects to our clients for almost 30 years! We are one of the Upper Midwest's longest-established private firms devoted entirely to assisting public and private entities with the integration of GIS technology throughout the country.

Pro-West & Associates, Inc. is looking for an **Application Developer** who will serve as an integral member of our growing application development team. Our focus is on implementing custom and semi-custom spatial (GIS) technologies for government and private clients. We work collaboratively in small teams and independently on smaller projects. Most importantly we are committed to great customer service to our clients and providing features that are of value to their businesses.

This is a full-time position (40 hours a week), with vacation, personal days, holidays, IRA, health insurance and HSA benefits, and short-term and long-term disability insurance. The position is located in our Walker or Crosslake office.

Education:

Bachelor's Degree in computer science or 4+ years demonstrated work experience in application development.

Job Responsibilities

- Participate in the design of simple and complex applications
- Work as part of a team to implement applications that adhere to design specifications
- Test, troubleshoot, and debug errors in new and existing applications
- Write clean, concise user and system documentation
- Participate in internal training and mentoring programs
- Participate in meetings with clients

Required Qualifications

- Experience with JavaScript
- Experience with Microsoft.NET
- Experience using a database to save, query and load application data

Preferred Qualifications

- Experience with web-based mapping libraries (eg. Google Maps, esri, Leaflet)
- Working knowledge of UI design principles
- Experience with MVC architecture or variant (MVVM, MVP, etc.)
- Web application development with HTML5 and CSS3
- Experience with Bootstrap or similar CSS framework
- Experience with relational databases, such as Microsoft SQL Server
- Experience with Python
- Experience working in small teams

Competencies

- Strong work ethic, a drive for success and proactive attitude
- Strong communication skills
- Desire and enthusiasm to learn new skills
