Mailing Label Widget

for Web AppBuilder

What is the Mailing Label Widget?

Pro-West's Mailing Label Widget provides the functionality to easily create mailing labels to contact property owners or residents in a specific area. No manual checking is required - simply buffer features and generate a label or CSV format output.

The Mailing Label Widget is designed for use within Web AppBuilder and ensures a task that should be simple, IS simple.

See a demonstration at: bit.ly/prowestmailinglabel

Key Benefits

- No manual effort required to check results
- Ensures data accuracy
- Efficient - minimizes time spent on this simple task
- Choice of formats for output, depending on needs, including a range of standard label sizes
- Choose whether to contact owners or occupants of properties
