# ArcGIS Solutions: Election Outreach

Educate the public and help voters find an appropriate voting center or Election Day polling place.

## What is Election Outreach?

State and local governments strive to improve voter participation through open communication and a sense of collaboration. Elections departments look for ways to increase voter turnout and engage constituents but are faced with changing behaviors of citizens who seem disconnected from the democratic process. Helping voters locate where they can vote and understand voting alternatives removes voter confusion. Communicating wait times to voters reduces congestion at polling places or voting centers and increases participation by helping voters decide when they want to cast their ballot on Election Day. Election Outreach is typically implemented by clerks, election commissions, or secretary of state offices that want to inform voters and increase participation in the elections.

The Election Outreach solution delivers a set of capabilities that help you share information about current elected representatives with the public, get voters to an appropriate voting center or Election Day polling place, communicate voting wait times and recruit poll workers.

## What are ArcGIS Solutions?

ArcGIS includes a series of solutions that align with business needs, transform use of ArcGIS, and maximize investment in location-based data and technology. ArcGIS Solutions come with the software and are fully supported, and there is not additional cost for any of the solutions available with ArcGIS. The only requirement is an ArcGIS subscription and licensing.

## What's included with Election Outreach?

Included is an ArcGIS Pro project and a collection of web applications used to inventory and maintain electoral districts, precincts, voting centers, and polling places.

## Why Purchase Services from Pro-West?

Leverage Pro-West's expertise to quickly deploy ArcGIS Solutions to your ArcGIS organization, configure them to meet your needs, and load your authoritative information.

## What is the Cost of Services?

Pro-West offers a competitive range of services based on the scale of an organization. Contact us to learn more about the types of services best for you.

## Available for
- ArcGIS Online
- ArcGIS Enterprise

## Developed for
- State and Local Government

## Version
2.0

## Success
- Butler County, KS
- Pope County, MN
- Wadena County, MN

Pope County, MN        Wadena County, MN
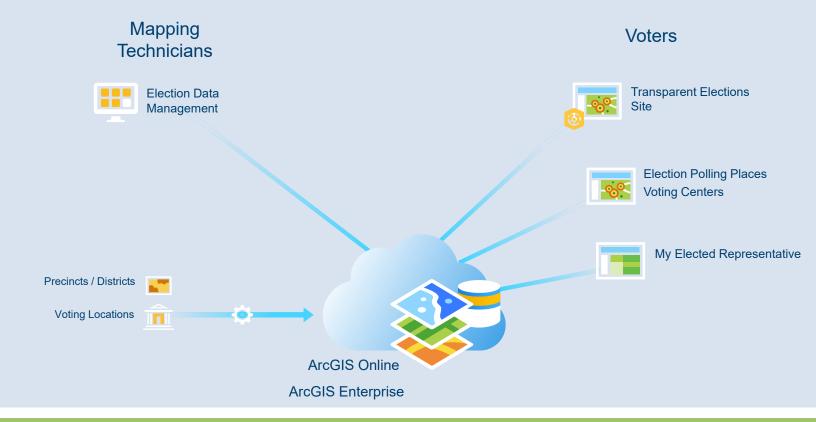

# Integrate with ArcGIS Enterprise

Build your foundation in ArcGIS Enterprise and connect to your existing user-managed data stores and ready-to-use storage behind your firewall or in the cloud.

# Requirements

- ArcGIS Online
- ArcGIS Pro 2.9 or later (Standard or Advanced)
- ArcGIS Enterprise (optional)

## Election Outreach
Focused Maps and Apps

# Services

Services are focused on delivering capabilities that meet your business needs.

*Standard* deployment options and training to get up and running quickly with your ArcGIS Online or ArcGIS Enterprise.

*Data* readiness review and migration to help make modifications to the maps and layers, and load your data.

*Extension* capabilities and customization to develop the additional functionality you need.
