

PROWEST & Associates

LOCAL GOVERNMENT GIS PACKAGES

From Pro-West & Associates

For many organizations, the most efficient way to implement a location technology solution to fit their needs is with an all-inclusive package. Choose from Pro-West's collection of ready-to-go packages, each containing a unique blend of Pro-West services, to deliver value through location intelligence.

GIS SUPPORT & STAFF AUGMENTATION PACKAGES

BLOCK SUPPORT PACKAGES

Value: Need a little or a lot of support? Need assistance that spans multiple types of services, such as data, enterprise, solutions and integration? Want on-demand support from technical leaders? This package may be the best option to meet your needs.

Includes: "Blocks" of GIS professional services support | Different levels available from 20-500 hours | Applicable to any service offered by Pro-West | Valid for 1 year | Cost-effective pricing | One line item for all GIS services you may need | Options to "buy up" or extend packages

END-TO-END GIS SERVICE PACKAGES

Value: For organizations that need to supplement their GIS teams, or that don't have in-house GIS staff, fill the gap with end-to-end GIS services. Benefit from expertise including application development, solution configuration, system integration, and data services.

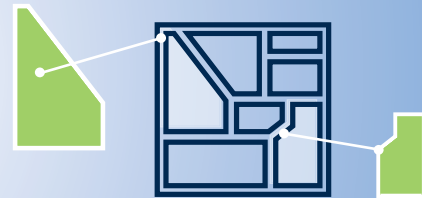

Includes: Support to define goals and required services | Defined time frame and budget to meet goals | Unique set of services built around your GIS goals | Support from GIS experts

LAND RECORDS MANAGEMENT PACKAGES

PARCEL FABRIC IMPLEMENTATION PACKAGE

Value: Stay ahead by deploying the Parcel Fabric in ArcGIS Pro – whatever your current method of managing parcel data. Enhance citizen engagement and information accessibility.

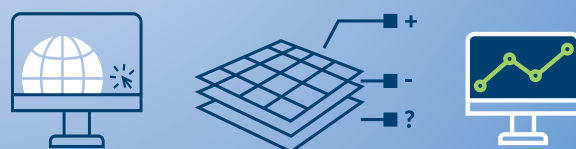

Includes: Data analysis | System architecture analysis | Data migration | Training and support

PARCEL MAINTENANCE PACKAGES

Value: Fill a resourcing gap or simply receive assurance that parcel updates will be performed on time, every time. Daily, weekly, monthly or quarterly maintenance is available.

Includes: Services to perform parcel updates including splits, merges, new subdivisions, lot line adjustments and right of way. Optional add-ons available.

Add ArcGIS User Types to any package

EQUITABLE PROPERTY VALUE PACKAGE

Value: Deliver a set of capabilities to share authoritative property information in a map-based application, modernize customer service, and promote fair and equitable property values.

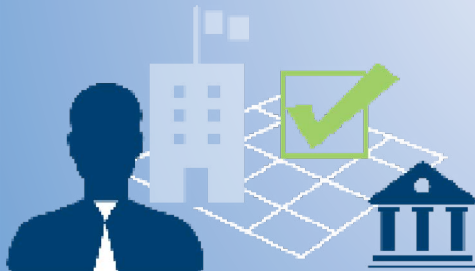

Includes: ArcGIS Experience Builder app to share authoritative property information on phones, tablets, and desktop computers to help combat misinformation.

PARCEL VALUE ANALYSIS PACKAGE

Value: Deliver a set of capabilities to visualize key property characteristics on a map, discover neighborhood patterns, analyze sales ratios, and identify outliers and inequities while maximizing use of ArcGIS and Esri licensing.

Includes: Set of interactive web maps and focused GIS apps that work together as a system to share authoritative property data with Assessors and Appraisers.

PUBLIC WORKS & ASSET MANAGEMENT PACKAGES

UTILITY NETWORK IMPLEMENTATION PACKAGE

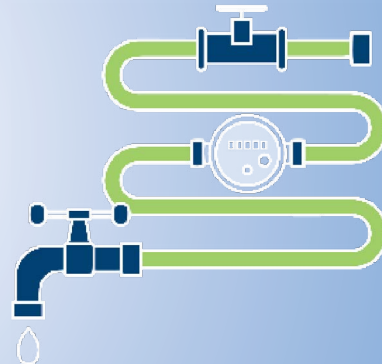

Value: Implement Esri's next-generation spatial information system for utilities, empowering your organization to improve data quality control, modernize workflows, visualize your network, and make more informed decisions.

Includes: Data assessments | Data migration to Utility Network | Data clean-up | Training and support

UTILITY ASSESSMENT PACKAGE

Value: Identify and understand existing data and systems, and define the right path to optimize utility operations.

Includes: Data assessments | Enterprise Assessment | Scripting assessment | Business system integration assessment | Plan with actionable steps

UTILITY SERVICES PACKAGE

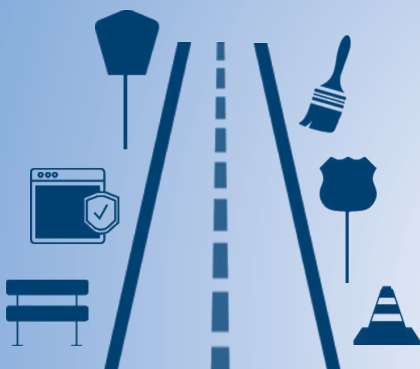

Value: Achieve an accurate and complete utility data set that drives a powerful suite of solutions to organize, streamline, modernize and analyze utility operations.

Includes: Data development/conversion | Training to edit your data (or Pro-West can provide maintenance) | Configuration of solutions for inventory, maintenance and inspections: dashboards to manage metrics field solutions for viewing and editing in the field with GPS integration | Training and support

ASSET MANAGEMENT PACKAGE

Value: Inventory assets (e.g. water, waste water, signs, storm water, culverts, pavement) and keep information up-to-date by providing easy-to-use interactive maps and apps for office and field staff. Quickly deploy ArcGIS Solutions to record, update and track information about your assets in real time, on a standard platform.

Includes: Esri software licensing | Configuration of 2 ArcGIS Online solutions | Asset Management Hub site | Data upload for chosen solutions | Training and professional services support

ENTERPRISE GIS SUPPORT PACKAGE

Value: Expert support whether your organization needs a jumpstart to get off the ground with enterprise GIS or wants to stay up-to-date with an upgrade. Whatever your goal, Pro-West's Enterprise GIS Support Package delivers modern sustainable infrastructure with the power to standardize and streamline location technology and workflows, bring location intelligence to all departments, enhance citizen engagement, and share valuable information.

Includes: System architecture analysis, design and implementation | Training and technical support | Optional ongoing management and maintenance

ENTERPRISE GIS PACKAGES

TECHNICAL AUDIT PACKAGE

Value: Identify and evaluate all technical components of your GIS - what you have, how it's performing, and what you need to meet your short- and long-term GIS goals. Make sure your system allows you to take full advantage of your licensing and implementation and offers room for growth.

Includes: Technical review of GIS (Enterprise GIS, existing data and data workflows, system integrations, data sharing, solutions, performance) | Recommendations for GIS success

EMERGENCY MANAGEMENT PACKAGES

EMERGENCY MANAGEMENT PACKAGE

Value: Centralize emergency management data, clean up errors, improve workflows for managing data across jurisdictions, and integrate with state and CAD systems for seamless, streamlined operations from start to finish.

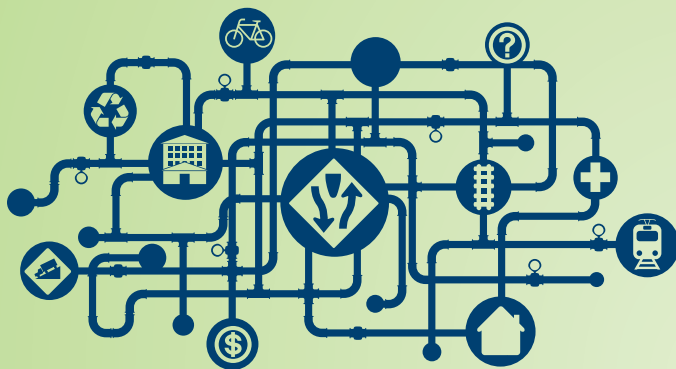

Includes: Data analysis and clean-up | Data development | NG9-1-1 compliance | Configuration of GIS solutions to centralize NG9-1-1 communication and allow users to submit address requests | Configuration of GIS solution to educate public on addressing process | Integration with CAD and other systems via scripts and ETL processes

ASSESSORS, RECORDERS AND LAND RECORDS PROFESSIONALS

Analyze your data for accuracy, create an environment for efficient data maintenance, take the right training and implement the right web applications to get valuable information to those who need it, in ways it is easily accessed and understood.

- ✓ Parcel Fabric Implementation Package
- ✓ Parcel Maintenance Package
- ✓ Equitable Property Value Package
- ✓ Parcel Value Analysis Package
- ✓ End-to-End GIS Service Packages

IT AND ENTERPRISE SYSTEMS
