Services for Assessors
from Pro-West & Associates

Assessors have unique needs, serving a role that forms the backbone of local government operations. Accurate and transparent property appraisal is vital, and having the right tools to maintain data efficiently, get information into the hands of those who need it, and engage with citizens during the process has never been more important.

Data Management:
Parcel Fabric Implementation Package

Manage data efficiently using the latest and most powerful technology: the Parcel Fabric in ArcGIS Pro. This platform offers a wealth of capabilities in response to the real-life needs of Assessors to make sure tax parcel data remains accurate, well organized, integrated with other land record systems and consistently managed over time.

Pro-West's Parcel Fabric Implementation Package includes all services needed for a smooth transition – whatever your current method of managing parcel data. It includes:

- Cloud or on-premise implementations
- Migration of parcel data to Esri's Parcel Fabric in ArcGIS Pro
- *Have existing parcel editors or transitioning staff into a new role?* Custom training for parcel editing staff including a manual and videos
- *No editing staff?* Pro-West offers ongoing parcel maintenance services
- Ongoing support and training as technology advances and as needs change
